

The Department of Radiology at the Mayo Clinic in Jacksonville, FL, is accepting applications for our 2024-2025 Cardiothoracic Imaging fellowship position. With direct access to Mayo Clinic's outstanding facilities and recognized faculty leaders, you will gain a high degree of proficiency in all facets of Cardiothoracic Radiology, including exposure to a diverse high-volume practice, access to state-of-the-art imaging equipment, personalized supervision, and mentorship by experts in the divisions of Cardiovascular Radiology and Thoracic Radiology. Fellows actively participate in weekly multidisciplinary conferences with subspecialty clinical and pathology colleagues. Program highlights include inpatient and outpatient chest radiography, CT, and MRI, as well as dedicated training in cardiovascular imaging, including cardiac CT, CTA, MRI, and MRA. Experience in image-guided thoracic interventions can be arranged, with additional opportunities to tailor the program to your unique needs, interests, and career goals. Research opportunities are included with dedicated research days and financial support for travel, lodging, meals, and registrations fees for research presentations. Prerequisites include ability to secure a full Florida medical license and American Board of Radiology eligible or certified status. More information can be found at:
